

Careers

Career opportunity for a developer

For a new development project, we are looking for full time **developers (m/f/d)**. We are an innovative start up located in Hamburg, Germany. Our systems support bio technical and commercial research facilities worldwide.

The main tasks include machine specific **programming** and user interface development mainly in the programming languages 'python' and 'ideally C' for image processing and control technique tasks.

Experiences as hardware developer is an advantage. **Hardware development** tasks are: Electronics development e.g. circuit board design, creation of circuit diagrams, FPGA-programming and analogue techniques as well as optics and laser techniques.

We expect a high level of flexibility of our employees. Willingness to take comprehensive tasks is as important as the ability of practical work e.g. prototype construction and testing as well as real data acquisition for application development.

Profound knowledge in **English language** is required due to our international business and we would appreciate advanced knowledge in the German language. Willingness to travel and communication skills are welcome since occasional customer visits might occur.

XtalConcepts GmbH is characterized by flexible working time and a friendly working environment. A low hierarchy helps to create a productive but relaxed working atmosphere.

Would you like to participate in an emerging young and innovative company and like to extend your horizon? Then do not hesitate and send us your complete application documents including your salary expectations to jobs@xtal-concepts.de

We are pleased to welcome you in our team!
